axonaccess@gmail.com

I have been a network administrator for an ISP for 14+ years. During this time I was also the lead web programmer using PHP+mySQL, Joomla and Wordpress to meet the needs of my clients. Compaq Accredited Systems Engineer specializing in AlphaServer/Tru64 Unix v4, I am very comfortable with various flavors of Linux, with extensive experience in RedHat and CentOS. Expert at building/maintaining/upgrading internet services in Unix/Linux environments. Created and maintain several e-commerce websites using the Virtuemart cart.

STRENGTHS

Extensive knowledge and experience in PHP, MySQL, HTML, JavaScript and CSS
Expert at building, maintaining and updating the L.A.M.P. environment
Adept at handling multiple tasks and learning new programming languages quickly
Proficient in Internet marketing, SEO optimization, website promotion and graphic design
Excellent interpersonal and organizational skills
Experienced discussing web technology with clients to determine the best design and functionality for their website
